SALES DOSSIER · GV BARRA ADD-ON

Stock goes down where it's handed over

The customer buys at the entrance bar and picks up wherever they want. Stock is deducted only when the bar that DELIVERS scans the slip — each bar answers for what it actually served.

ONE QR PER PRODUCT · DEDUCTED ON DELIVERY · COUNT PER BAR · REQUIRES STOCK PRO

Prepared for
GVenue.com.ar

ARGENTINA
NOVEMBER 2026 · V1 · GVENUE.COM.AR

01 The idea, in four lines

If you have more than one bar, you surely charge at one and serve at another. The problem isn't the line: it's that **stock goes down at the bar that charged even if the bottle comes from another**, and from then on each bar's count is off forever. With cross-bar sales, goods are deducted **where they were actually handed over**.

> **The real problem it solves**
>
> It's the classic in big venues: the entrance bar sells everything and the balcony bar hands out half of it. At closing, the entrance bar has a phantom shortage and the balcony bar a phantom surplus. Nobody stole anything, but nobody can prove it — and the count stops being useful for control.

How it works

- The customer buys at any bar and pays there.
- The ticket comes out with **one QR per product**, not just one for the whole sale.
- They go to whichever bar they want and show the slip.
- That bar **scans** and serves. Only at that moment does stock go down, and it goes down at the bar that delivered.

02 What you won't find anywhere else

✓ **Each bar answers for what it actually served**
Each station's opening and closing count makes sense again, because it compares against what that bar delivered — not against what was charged at the other end of the venue. It's the condition for the shrinkage audit to tell you anything.

✓ **One QR per product prevents the «I already picked it up»**
Each unit is handed over only once: the scanned stub is marked. No more arguing over whether that drink already went out, and the customer can pick up one at a time, whenever and wherever they want.

✓ **Eases the crowd without adding another till**
You can dedicate the entrance bar to charging and the inside bars to serving. It's cheaper than opening a new station and doesn't force you to move the counter.

> **What it needs to work**
>
> This add-on needs **Stock Pro** (so there are storerooms per bar) and the **printed ticket** turned on (because the QR travels on the slip). If you don't have them yet, they're in the GV Barra dossier.

03 Why GVenue, and not someone else

Every system in this business promises the same things. These six are the ones that, in practice, change how it feels to use it — and the ones you can check for yourself before you sign anything.

1 **Truly modular: you pay only for what you use**

GVenue isn't sold as a single license with fifty screens you'll never open. Each module is hired on its own and switched off on its own. If next month you don't use Cross-bar sales, you drop it and it stops being billed. There's no «plan» forcing you to pay for what you don't need to get to what you do.

2 **Our prices are published**

Go to **gvenue.com.ar/armar**, tick what you need and see the total, today, without leaving your phone number or booking a demo. In the survey we did of the Argentine market (July 2026), no competitor publishes its prices: you have to ask for a consultation to find out what it costs. We'd rather you do the math before you talk to us.

3 **The venue's data belongs to the venue**

Your customer base, your sales and your history are yours: you export them to Excel whenever you want, without asking permission or paying extra to «release» them. And if one day you want to move the whole system to a server of your own, that version exists — you're never locked in.

4 **You talk directly to the developer**

No help desk, no middlemen: you talk to the person who builds the system, who gets your request the first time and solves it in the code. A specific request that doesn't exist today is quoted by the hour and, if it helps other venues, it joins the catalog for everyone. Several of the features published today were born exactly like that, requested by a client in production.

5 **Every module has its manual and its videos**

We don't leave you with an afternoon of training and good luck. Every module has a PDF manual with real screenshots of the system, plus video tutorials — in Spanish, with the manuals being translated into English one by one — so when someone new joins the team they learn it on their own, during their shift, without you having to explain it all over again.

6 **Anywhere in the world, in the language you need**

It's a cloud system: it works from any country, on a PC, a tablet or a phone. Today it speaks Spanish and English, and another language can be added on request. And it's 100% configurable: hours, names, permissions, prices and screens adapt to the way each client works, without switching systems.

> **And one that isn't a feature**
>
> We publish our **policies** —what we do and don't do with your data and your money— at gvenue.com.ar/politicas. They're written to be read, not to cover ourselves. And we work under a quality management system: **GVenue is going through internal audits of its Quality Management System, ahead of the external audit for its upcoming ISO 9001:2015 certification**.

04 The money, crystal clear

> **GVenue doesn't touch a single peso of what goes through this module**
>
> Our billing is **exclusively on ticket sales**. What you charge at the bar, at the cloakroom and for any extra at the venue is **100% the venue's**: it doesn't go through any account of ours, it carries no commission and we don't bill it. Cross-bar sales is paid with a flat monthly fee and nothing else — sell a thousand drinks or ten thousand, the fee is the same.

How you take payment at the counter

That money doesn't go through us: it goes wherever you say. The system records it so your register closes, in this order of real-world use:

1. **Cash**
   Most of what's charged at the venue. It's entered with the sale, and the closing cash count checks it against what's left in the register.

2. **Bank transfer**
   The customer transfers to your account and the cashier marks the sale as a transfer. The money goes straight to your bank, with no intermediary.

3. **Crypto (USDT)**
   Same approach, for the customers who pay that way.

4. **Card, with your card terminal**
   Your terminal is linked to the system: the cashier charges on your terminal and the sale confirms itself when the terminal approves it —no «paid» marked by hand, no mismatches—. That card money is credited through your own account, on your terminal's timelines; we don't step in on that money.

> **SOON What's coming, and isn't here yet**
>
> We're working on **GV-Posnet**: GVenue running **inside** the card terminal, so the cashier can do everything from the device. It's **in development** — it isn't something you can hire today and it isn't included in any price in this dossier. We mention it because it's where the module is headed, not because it's here.

The monthly fee

- **It's billed one month in advance.** You get a grace period of 10 to 15 days and staggered notices before any restriction — you'll never find the system switched off in the middle of an event over an invoice.
- **The prices in this dossier are the published ones.** Any special volume terms are **agreed by contract**, case by case: there's no automatic discount and no hidden price list.
- The fee is monthly, in US dollars, and it's invoiced in Argentine pesos at the exchange rate of the day.

05 The price

🔀 CROSS-BAR SALES

USD 19/mo

The customer buys at the entrance bar and picks up wherever they want: the balcony bar, the main bar, any of them. The ticket prints one QR per product and stock is deducted only when the DELIVERING bar scans the stub — each bar answers for what it actually served. Requires Stock Pro and printed tickets.

> 🎟️ **If you sell your tickets with GVenue, your monthly fee drops 50%**
>
> The whole system is modular: you pay the monthly fee for the modules you use. **If you sell your tickets with GVenue and go over 300 paid tickets a month of at least ARS 10,000 each** (average of the last 3 months; complimentary tickets and invitations don't count), the monthly fee for your modules drops **50%**.

* Dollar amounts are reference values for the fully functional system with onboarding done by the client. In Argentina, invoicing and payment are in pesos at the current reference dollar rate. If anything additional has to be configured or developed, the price is agreed separately. Licenses outside Argentina are billed in USD via USDT (reference values, billed in USDT for licenses outside Argentina).

What other modules it adds up with

There are two bundles, and there will always be just two: there's no ladder of plans with ever-longer names.

BUNDLE	WHAT IT BRINGS TOGETHER	PRICE
🏢 **Operations Suite**	The basic operation: core Bar + cash till + basic reports + Access (list accreditation + blocklist) + basic staff (onboarding, schedules, attendance, handovers — without the payroll part). Pro add-ons are added separately or with the Suite Pro	**USD 119/mo**
🏢 ⭐ **Suite Pro**	The Suite + Staff with P&L (per-night pay and final balance) + Parking + VIP Sector + Cloakroom + the full Barra Pro bundle (Stock, Recipes, Promos, AI Photos, Pro Report). Includes 🧾 E-invoicing for 1 CUIT (in testing). Kiosk, card terminal, Concierge, GV Cash, Merch and Consignment are hired separately	**USD 199/mo**

If a module already comes inside the bundle you hire, **it isn't charged separately**. And when a bundle grows with a new feature, whoever already pays for it gets it without a price increase.

06 Who made it?

GVenue is an Argentine system, made by **Gozzi.dev**: a software development studio based in Mar del Plata that works with each client directly.

Javier Gozzi · founder of GVenue and Gozzi.dev

He has been developing software since 2009. He was Technical Manager at El Divino Buenos Aires and Complejo Sobremonte (Mar del Plata), and then he wrote the system for the night: GVenue is designed from inside the club, with a packed door, a bar running out of stock and a register that doesn't add up. At GVenue he handles the product, the architecture, the backend, the infrastructure and the design.

linkedin.com/in/javgozzi

gvenue.com.ar/quienes-somos

Gozzi.dev's work

GVenue · modular system for venues and events

RespondIA · AI assistant to serve and sell on the web and WhatsApp

Gozzi Hosting · Argentine hosting on its own infrastructure

MG Muebles and **Caruso Centro MDQ** · commercial websites

Alisaplack · drywall construction

Porsche Design Tower Miami · the building's website, for Dezer Development

Why hire GVenue

1. **Made by people who know the night**
   It isn't generic software adapted to a nightclub: it was born from the technical management of nightlife venues, and that's why Cross-bar sales solves real problems of a Saturday in the small hours.

2. **Direct support from the person who writes it**
   No help desk, no tickets: you talk to the person who writes the code.

3. **Made in Argentina, with published prices**
   Prices in US dollars in plain sight at gvenue.com.ar/armar, and support from Argentina (UTC−3).

4. **Truly modular**
   You hire only what you use —tickets, door, bar, tables, courts, music— and each module is switched on or off separately.

5. **100% configurable, and custom-built if something's missing**
   Hours, prices, rules and permissions are changed from the panel; what doesn't exist gets developed. Behind it there's a real studio, with a name and a face.

07 Next steps

You hire it yourself, in five minutes

Go to **gvenue.com.ar/armar**, tick Cross-bar sales and whatever else you need most, and you'll see the monthly total right there. That same screen generates the contract with the detail of what you hired — no fine print and no salesperson breathing down your neck.

And before the fee starts running, you get a **15-day trial** to load your data and test it with your own information. If during that time you decide it's not for you, you haven't paid anything.

GVENUE.COM.AR/ARMAR/?LANG=EN

Shall we see it working with your numbers?

Half an hour on a video call, with your real menu or schedule loaded, is worth more than any presentation. Write to us and we'll set it up.
